New from Frantz Manufacturing Company, the Flange Mount EZ Glider™ is the latest addition to the EZ Glider™ family, the most complete line of one-inch ball transfers on the market. Frantz Manufacturing Company has been known for quality, design and durability since 1909, and the EZ Glider™ is a proud addition to the family. Developed in response to our customer's needs, the EZ Glider™ flange mount ball transfer can meet your material handling needs wherever strength, flexibility and quality are considerations.

The metal major and minor balls in the EZ Glider™ ball transfers are Frantz

grade 1000 carbon steel or stainless steel. Expanding the versatility, the EZ Glider™ family is also available with three types of plastic major balls for applications where care must be taken to avoid surface marks.

The five types of major balls ensures that these flange mount models can meet the most demanding applications. This family of 20 flange and stud mount models makes EZ Glider™ the broadest line of one-inch transfers available — broad enough to meet your every need.

## FLANGE MOUNT BALL TRANSFER SYSTEM

### LOAD

#### Maximum Static Load (pounds/kgs)

Carbon Steel	150 68.1
Stainless Steel	150 68.1
Polypropylene	50 22.7
Nylon	75 34.05
Acetyl	125 56.75

**Note:** Shell and ball race on all models are carbon steel. Stainless steel models have stainless steel major and minor balls. Plastic models have carbon steel minor balls. Load ratings are for static load conditions, not impact rating.
